eCommerce API Documentation Overview

NAMES: Sylvie Umwiza

REG_NO: 22RP04263

Project: eCommerce API

This Postman documentation provides a comprehensive guide to interacting with the eCommerce API.

It includes detailed information on all available endpoints, supported HTTP request methods (GET, POST, etc.),

required headers, query/body parameters, and example responses.

The documentation is designed to assist both developers and testers by streamlining the integration process

and ensuring efficient and accurate API usage.
